A second independent survey confirms it:
American Airlines is the frequent flyer's
No. 1 choice for domestic air travel!

More than a year ago, the Airline Passengers Association surveyed its frequent-flying members.

The question: If you were flying anywhere in the United States, and had your choice of any U.S. airline, which would you choose?

The answer: More people chose American than any other airline, and the overriding reason was service.

But now the results are in from a new survey by the Opinion Research Corporation of Princeton, N.J. They interviewed 513 middle and top management executives from America's largest companies.

The question: If you had your choice of any U.S. airline, to any United States destination, which one airline would be your first choice?

The answer: Again, more people chose American than any other airline.

Different surveys, similar questions, identical results.

American Airlines is the frequent-flyer's number one choice for domestic travel.

So whether you're flying on business or vacation, remember:

We're American Airlines. Doing what we do best.
